About the authors
Pete Cranston first engaged with models of learning and knowledge while working in Adult and Community Education in the UK, mainly with migrant and refugee families and youth. Pete is constantly surprised how much overlap there is with his new world of ICT/Digital/KM4Dev/NfP consulting and grows more and more scared of our inability to engage effectively with climate change. E-mail: pete.euforic@gmail.com

Carl Jackson has been a member of KM4Dev for longer than he can remember and the community was instrumental in him becoming an independent knowledge management consultant working with intergovernmental agencies, bilateral donors, non-governmental organisations (NGOs), foundations and research organisations. His work focuses on diagnosis and design of knowledge management strategies and programmes; learning process facilitation; operational research; training and mentoring in KM skills; and review and evaluation of knowledge and communication services. E-mail: carlwkg@gmail.com
